Subject: Microsoft Settlement

In accordance with the Tunney Act, I am submitting my comments on the proposed settlement for the Microsoft antitrust case.

In my opinion, the settlement does not punish Microsoft or help competitors adequately. It seems like the Department of Justice is not interested in the case any more, but I feel that is is very important to the United States.

I have worked in the computers/telecom industry for 15 years, and I can't imaging how different things would be today if there had been real competition. I believe that they have caused significant damage to productivity and the economy.

Please reject this settlement and create one that can reduce further damage that Microsoft can do to the industry and the economy.

Thank you
